# ESIMMU

“eSIM Installation Guide for iOS.”

# Compatibility Check

**ESIMMU**

Multi Use eSim, ESIMMU

📌 Go to Settings > Cellular (Mobile Data) and check if there is an option to add an eSIM.

✓ If this option is available, your device supports eSIM!

✗ If not, your current device does not support eSIM.

**! The registered eSIM device cannot be changed.**

The registered eSIM device cannot be changed, so please register only your own eSIM.

Q. I accidentally registered my friend's eSIM. Can I change it?

A. No, changes are not possible.

Q. If I accidentally delete my eSIM, can I re-register and use it again?

A. No, re-registration is not possible. Please make sure to delete it only after you have finished using it."

**No device  
change after  
registration**

**180 days  
from  
purchase**

**! Please use the eSIM **within 180 days** from the date of purchase.**

The purchased eSIM is valid for 180 days. Please make sure to use it within this period!

Q. Can I register it in advance before use?

A. Yes, you can register it at any time. However, you must complete usage within 180 days.

Q. Does the 180-day period start after registration?

A. No, the 180-day period starts from the purchase date. Please complete usage within this timeframe.

# Register eSIM with internet

**! Please ensure you install the eSIM only where an internet connection is available.**

eSIM installation is only possible when you have an active internet connection.

Q. Can I install it without Wi-Fi?

A. Yes, as long as you have a stable internet connection, you can install it anytime.

Q. Can I register the eSIM before arriving at my travel destination?

A. Yes, you can register it in advance without any issues.

**! If scanning is not possible, register manually.**

Refer to the installation guide below for manual registration without scanning.

Q. Can I register an eSIM if my camera is broken?

A. Yes, it is possible. Please refer to „Installing eSIM without scanning“.

Q. My device is compatible, but QR scanning is not working.

A. Please refer to „Installing eSIM without scanning“.

**eSIM registration  
possible without  
QR scan**

## ✔ Important eSIM Tips

### 📶 Before You Install

- Wi-Fi required: Make sure you're connected to Wi-Fi.
- Use your own phone: Installation must be done on the phone you plan to use.
  - QR code can only be used once and cannot be transferred to another device.

### 📅 Usage Period

- Please install and use your eSIM within 180 days of purchase.

### 🌐 Countries Requiring Caution for Installation

The following countries require identity verification procedures:

🇹🇼 Taiwan, 🇭🇰 Hong Kong, 🇲🇴 Hong Kong/Macau

📄 Please refer to the installation guide PDF for identity verification instructions!

### 🔍 Can't Scan the QR Code?

If QR scanning doesn't work,

▶ check the [Manual Setup PDF] for step-by-step instructions.

### 📱 After Installation – Final Setup

Once installed:

- ▶ Set the installed eSIM as your active data plan
- ▶ Enable data roaming
- ▶ For iPhones, make sure to switch to the correct profile

# Notice

“In Turkey, installation is mandatory before entry! ”

Update as of August 5, 2025!

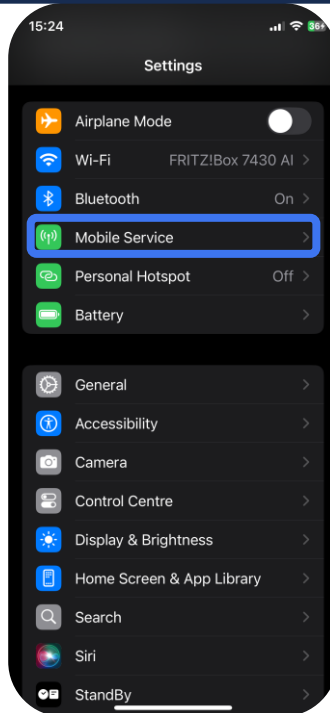

"I've installed it as instructed,  
but the internet is not working! 🙄📶❌"

Don't worry — you can fix it with the steps below!

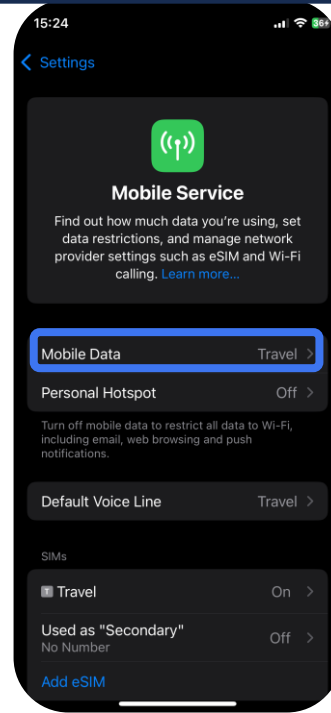

"I've installed it as instructed, but the internet is not working! 😞📶✖"

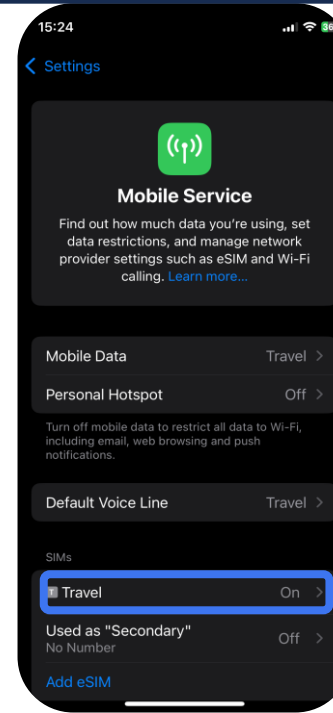

Don't worry — you can fix it with the steps below!

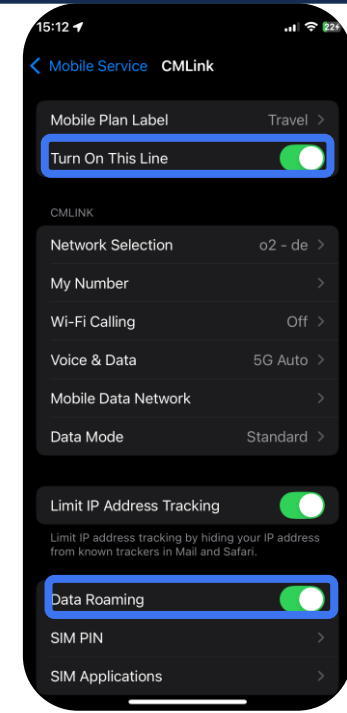

Go to Settings on your device and tap **Mobile Service**

Make sure the **installed eSIM** is selected under Mobile Data.

Tap on the **installed eSIM**

Turn on this **Line** and **Data Roaming**

# Solution 02

“I've installed it as instructed, but the internet is not working! 😞📶✖”

Don't worry — you can fix it with the steps below!

## Step 1

After completing **Solution 01**, restart your phone 📱🔄

This helps your device reconnect to the network.

## Step 2

Next, try taking a **light walk**.

The signal is usually picked up **within 10 minutes** 📶 and your internet should start working!

In some areas with **weak signal reception**, it may take **more than 30 minutes** to connect to the internet.

But don't worry — the connection should be established soon 😊

If the internet still doesn't work after trying the solutions and your usage remains at 0, you can request a refund by logging in on the ESIMMU website.

Thank you!

"Installation was successful,  
but the internet is slow! 🙄💤📶"

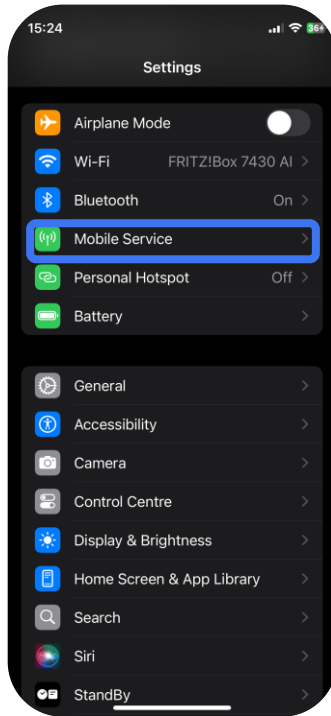

Don't worry, here's how to solve it!

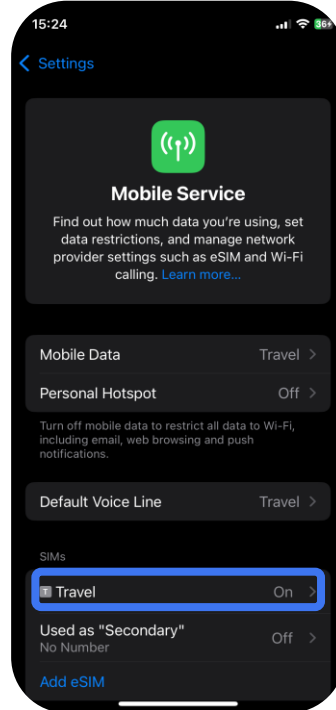

"Installation was successful, but the internet is slow! 🙄🔌📶"

Don't worry, here's how to solve it!

# Solution 01

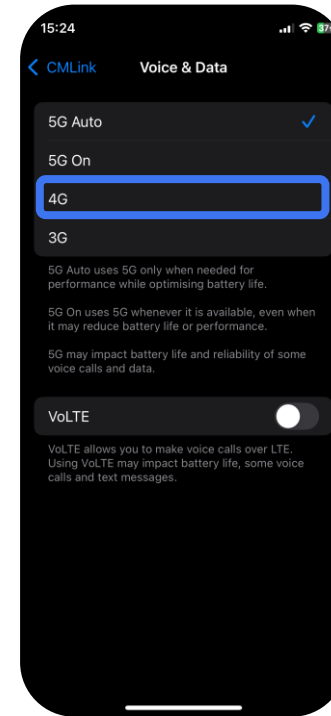

Go to Settings on your device and tap 'Mobile Service'

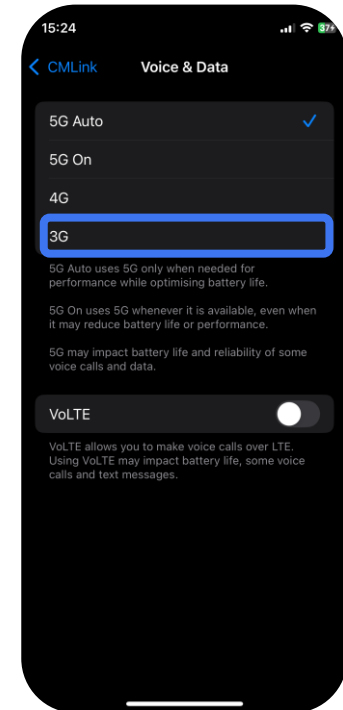

Tap on the installed eSIM

Tap 'Voice & Data'

Switch to LTE (4G) and check if the speed improves.

If the speed does not improve with LTE (4G) Preferred, try testing with 3G

# Solution 02

"Installation was successful, but the internet is slow! 🙄🔌📶"

Don't worry, here's how to solve it!

## Step 1

After completing Solution 01, check which network connection gives you the **fastest internet**. Usually, **5G priority works fine, but in some countries, 4G or 3G might be faster!**

## Step 2

Go to Settings → Connections → SIM Manager, try disabling your current SIM card and test the speed. If the speed gets better, you can try re-enabling your original SIM card afterward.

Sometimes there may be **interference with the signal**,  
or the internet speed may be slow **depending on the device and network**.

Don't worry — the internet speed should return to normal soon 😊

If the internet speed does not improve after trying the solutions and your daily usage is below 8%, you can request a refund by logging in to the ESIMMU website. (For example, less than 40MB usage on a daily 500MB plan)

Thank you.

"In this country, eSIM usage requires identity verification!   "

You can resolve this using the steps below!

# Countries requiring eSIM registration 01

ESIMMU

Multi Use eSim, ESIMMU

Due to local regulations, identity verification is required to use eSIM in Taiwan, Hong Kong, and Macau.

If you wish to use the service, please access the link below and complete the verification process by following the provided steps.

## Real Name Registration

**① Take notice of**

According to the policy of Hong Kong (China) and Taiwan (China), customers must complete the real-name registration of their SIM before using. You do not need to register your SIM if you are not using it in these two regions.

- It is recommended to complete the real name registration before arriving, or if you have already arrived in the region, you may connect to nearby Wi-Fi to complete the registration.
- If the uploaded information does not meet the requirements, your registration will be rejected. We will inform you of the result via SMS and Email.

Please be assured that the information will only be used for real-name registration.

**\* Region of use for real name registration ( Destination)**

☐ Hong Kong, China ☐ Taiwan, China ☐ Hong Kong, China and Taiwan, China

**\* Contact information**

E-mail

Example: test@example.com

1. Please install the purchased eSIM on your phone first.
2. Fill out the form on the page according to the required format.
